Lessons Learned

Bea: *Crime Scene Manager/Crime-Scene Specialist*

- The lessons that I learned as the Crime Scene Manager include:
  - Procrastination is your number one enemy
  - Not all evidence will paint a clear image of the incident investigated
  - Organization skills are key to ensure the best results. If it's starts messy most likely it will end the same way
  - Know your lab's analytical protocols. Avoid unnecessary requests. That's time and money wasted
  - Forensic investigation is hard, challenging, never-ending work

Lessons Learned

Laurent: *Crime Scene Recorder*

- The lessons that I learned as the Crime Scene Recorder include:
  - Communication is key- Make sure you are on the same page with your team.
  - Don't be afraid to ask for help if you need assistance with documenting evidence into the Chain of Custody Log.
  - Make sure that all forensic personnel are wearing PPE and constantly changing gloves- Don’t contaminate the evidence and scene!
  - Working as a team to figure out the crime scene is more difficult than what is protrayed on T.V.

Lessons Learned

Devynn: *Crime Scene Specialist & Photographer*

The lessons that I learned as the Crime Scene Specialist & Photographer include:

- This field of work is incredibly hard, and it should not be seen as easy in any shape or form
- ALL OF THE TV SHOWS LIED!
- That is a field I am still interested in and am thinking about going into with more understanding of the work involved in doing a job in this field
- It has made me have an immense amount of respect for the people who have done or are currently doing this job
- How to process a crime scene, how to put in requests to the crime lab or law enforcement (even though it was a lot less paperwork than what it truly is)
- Finally, I learned the sticky notes never end!

Lessons Learned

Lisbeth: *Crime Scene Diagrammer*

- The lessons that I learned as the Crime Scene Diagrammer include:
  - It is incredibly difficult to find a point of origin for the entire scene to diagram and to accurately reconstruct on a graph.
  - It is vital to zone out the crime scene in to maintain order with what evidence comes out from where especially if its more than one of the same item, and for organizational purposes.
  - Detail is important, especially when it comes to reconstruction of the crime scene and verifying that every detail collected is accurate.

Lessons Learned

Annia: *Crime Scene Photographer*

- The lessons that I learned as the Crime Scene Photographer Include
  - Maximizing the depth of field
  - Keeping the film line parallel
  - Paying attention to detail
  - Keeping a photo log
  - Ensuring that all photos are clear and accurate
  - Ensuring that all photos are capture in chronological order.
  - The biggest lesson I learned of all is to have fun!
